Effective non-contact temperature screening

Check temperatures quickly and easily

With temperature checking now becoming a normal part of life around the world, anyone entering your building can be checked for signs of fever instantly with this automatic wall or stand mounted non contact thermometer. Instant temperature checks mean employers can improve health and safety for staff and customers.

Simply stand in front of the infrared sensor and temperature will display instantly on the clear, LED display. Healthy temperatures will be displayed alongside a green light and a beep. If a temperature is high, continuous beeps will sound and the LEDs will flash red.

Automatic checks, anywhere

The thermometer can be set up exactly where you need it

Thanks to long lasting battery power, with auto power-off (or the USB power lead, included) you can set the position of this thermometer anywhere. Wall fixings are provided, but with a screw fitting on the bottom, the thermometer can be fixed to a tripod or stand, too.
