Marsden T-110: Instant, high accuracy temperature readings from the ear or forehead

Specification

Dimensions: 146mm x 37mm x 39mm

Non contact measuring distance: 1cm (body/object modes)

Response time: 1 second

Measuring range (Body/Ear modes): 10°C - 40°C

Measuring range (Object mode): 5°C - 40°C

Measuring accuracy: ± 0.2°C

Power: 2x AAA alkaline batteries

Battery life: Upto 300 temperature measurements

1 second temperature checking

In ear, body or object mode

Measure temperature instantly with the T-110 Infrared Ear & Forehead Thermometer.

This **3-in-1** (ear, forehead, object) device provides a **reading in one second**, either in °C or °F. Point the infrared sensor at the forehead for a non-contact temperature reading, or remove the cap and measure tympanic (ear) temperature.

The T-110 is **Medical Devices Directive (MDD) Approved**, so you can be assured of reliability and high accuracy with every reading.

Store 20 temperature readings

Quick recall to compare readings

The T-110 can store as many as **20 measurement readings** in its internal memory.

With the press of a button you can compare previous readings, to see if temperatures have gone up or down.
